Prompt cards

Prompt card 1

John is 30 years old. For some weeks now he has been feeling unusually sad and unhappy. Although he is always tired, almost every night he cannot sleep. John has lost his appetite and has lost weight. He cannot concentrate on his work and puts off making various decisions. In his daily employment he seems not to be getting things done. John's superiors have started to notice that his efficiency at work is on the decline.

Prompt card 2

Mary is 30 years old. For some weeks now she has been feeling unusually sad and unhappy. Although she is always tired, almost every night she cannot sleep. Mary has lost her appetite and has lost weight. She cannot concentrate on her work and puts off making various decisions. In her daily employment she seems not to be getting things done. Mary's superiors have started to notice that her efficiency at work is on the decline.

Prompt card 3

John is 24 years old and lives with his parents. After he left school he had several temporary jobs and is currently unemployed. For over six months, he has stopped seeing friends, locks himself in his bedroom, does not eat with the family and refuses to take a bath. In the middle of the night when everyone is in bed, his parents can hear him walking up and down in his room. His parents know he is alone but it almost seems as if there is another person in the room since they can hear him making a noise and arguing. When his parents urge him to get out and do something, he mutters that he cannot leave the house because someone in the neighbourhood is watching him. He does not meet anyone, does not go anywhere and his parents are convinced he is taking drugs.

Prompt card 4

Mary is 24 years old and lives with her parents. After she left school she had several temporary jobs and is currently unemployed. For over six months, she has stopped seeing friends, locks herself in her bedroom, does not eat with the family and refuses to take a bath. In the middle of the night when everyone is in bed, her parents can hear her walking up and down in her room. Her parents know she is alone but it almost seems as if there is another person in the room since they can hear her making a noise and arguing. When her parents urge her to get out and do something, she mutters on that she cannot leave the house because someone in the neighbourhood is watching her. She does not meet anyone, does not go anywhere and her parents are convinced she is taking drugs.

Prompt card 5

John is 30 years old. For some weeks now he has been feeling unusually sad and unhappy. Although he is always tired, almost every night he cannot sleep. John has lost his appetite and has lost weight. He cannot concentrate on his work and puts off making various decisions. In his daily employment he seems not to be getting things done. John's superiors have started to notice that his efficiency at work is on the decline. John feels as if he will never be happy again and believes that his family would be better off without him. In order to rid himself of this pain, John is constantly thinking of ways of ending his life.

Prompt card 6

Mary is 30 years old. For some weeks now she has been feeling unusually sad and unhappy. Although she is always tired, almost every night she cannot sleep. Mary has lost her appetite and has lost weight. She cannot concentrate on her work and puts off making various decisions. In her daily employment she seems not to be getting things done. Mary's superiors have started to notice that her efficiency at work is on the decline. Mary feels like she will never be happy again and believes that her family would be better off without her. In order to rid herself of this pain, Mary is constantly thinking of ways of ending her life.

Prompt card 7

John is 44 years old. He lives in a dormitory adjoining a construction site and has not worked for some years. Whatever the weather he wears the same clothes all year round, his hair is long and unkempt. He is always by himself, and is often seen sitting in a park talking to himself. Sometimes he would suddenly stand up and start talking to someone as if they were next to the tree and would wave his hands about. He rarely drinks (beer, spirits, etc.). He speaks carefully and uses unusual language and occasionally makes up his own words. He is polite but avoids verbal contact with others. Sometimes he accuses shopkeepers of spreading information about him to other people. He has asked the landlord to put another lock on the door and a remove the television. He says that spies are trying to place him under surveillance because he says he has secret information about a international computer system that controls people via a television transmitter. The landlord complains about the filthy condition of the apartment and the amount of glass items piling up. John says he is using them to receive messages from outer space.
