

PEP12 : t-SNARE involved in Golgi to vacuole transport

RCY1 : F-box protein involved in endocytic membrane traffic and recycling out of early endosome

SNF7 : Involved in protein sorting in the pre-vacuolar endosome, component of the ESCRT-III complex

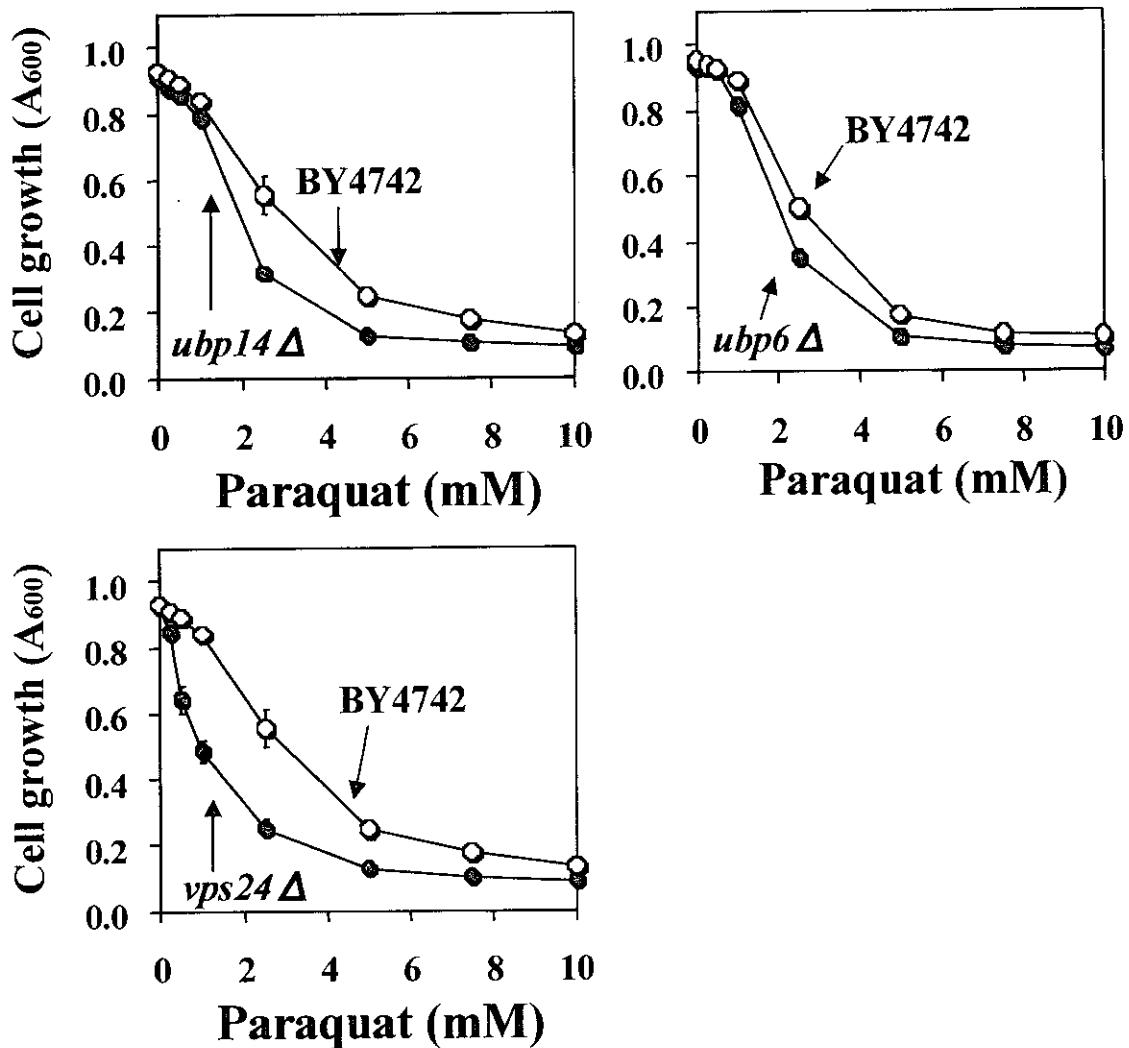

SNF8 : Class E vacuolar sorting protein, component of the ESCRT-II complex

Fig. 5-4 Sensitivity of *PEP12*, *RCY1*, *SNF7*, or *SNF8* deletion mutant to paraquat

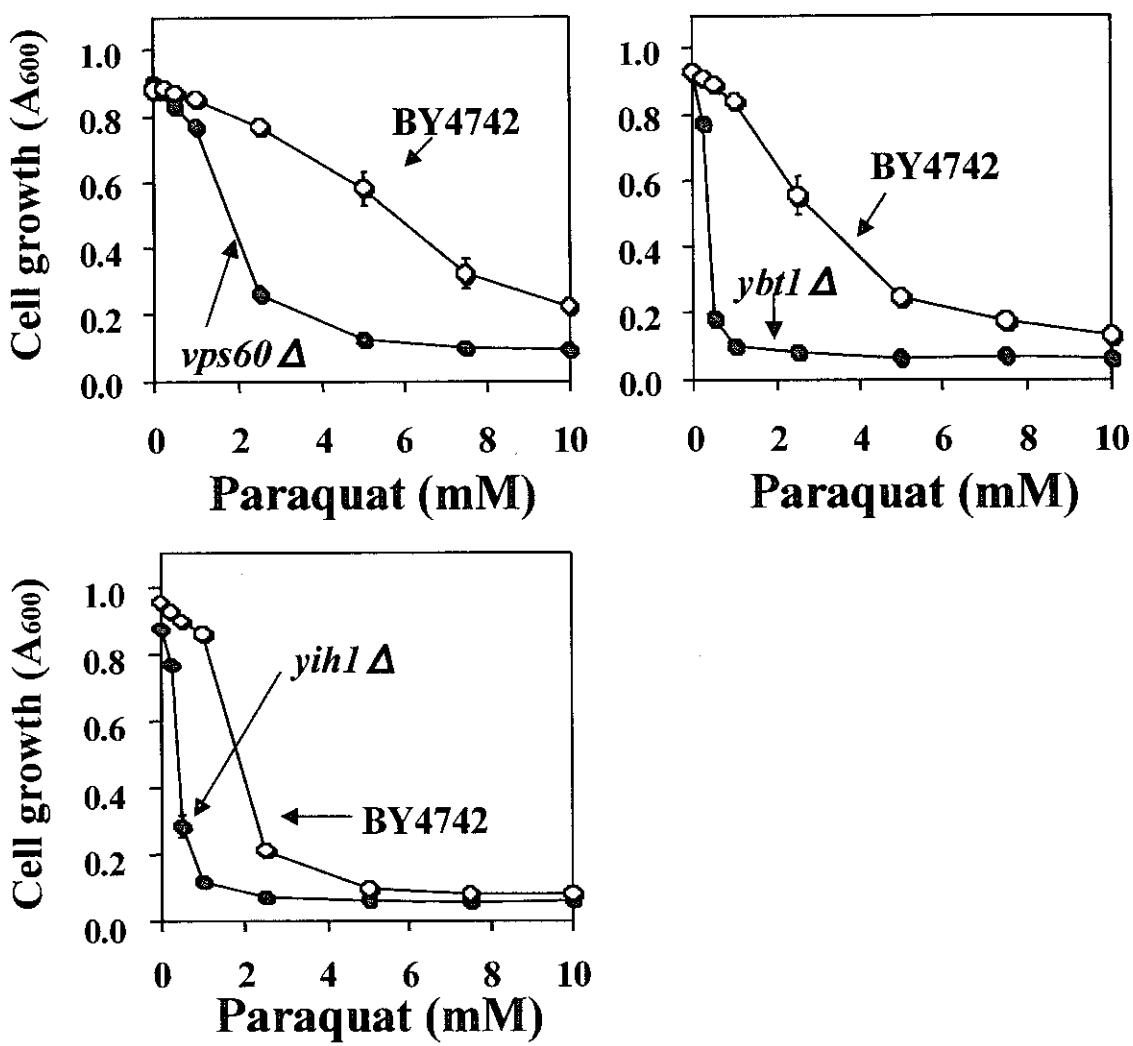

- SRN2*** : Class E vacuolar sorting protein, component of the ESCRT- I complex
- STP22*** : Required for vacuolar targeting of plasma membrane protein, component of ESCRT- I complex
- TOM37*** : Component of the mitochondrial outer membrane receptor (TOM) complex
- UBA3*** : Rub1-activating enzyme, similar to ubiquitin-activating E1-like protein

Fig. 5-5 Sensitivity of *SRN2*, *STP22*, *TOM37* or *UBA3* deletion mutant to paraquat

UBP14 : Ubiquitin-specific protease, ubiquitin C-terminal hydrolase
UBP6 : Ubiquitin C-terminal hydrolase associated with the 26S proteasome, involved in ubiquitin turnover
VPS24 : Component of the ESCRT-III complex

Fig. 5-6 Sensitivity of *UBP6*, *UBP14* or *VPS24* deletion mutant to paraquat

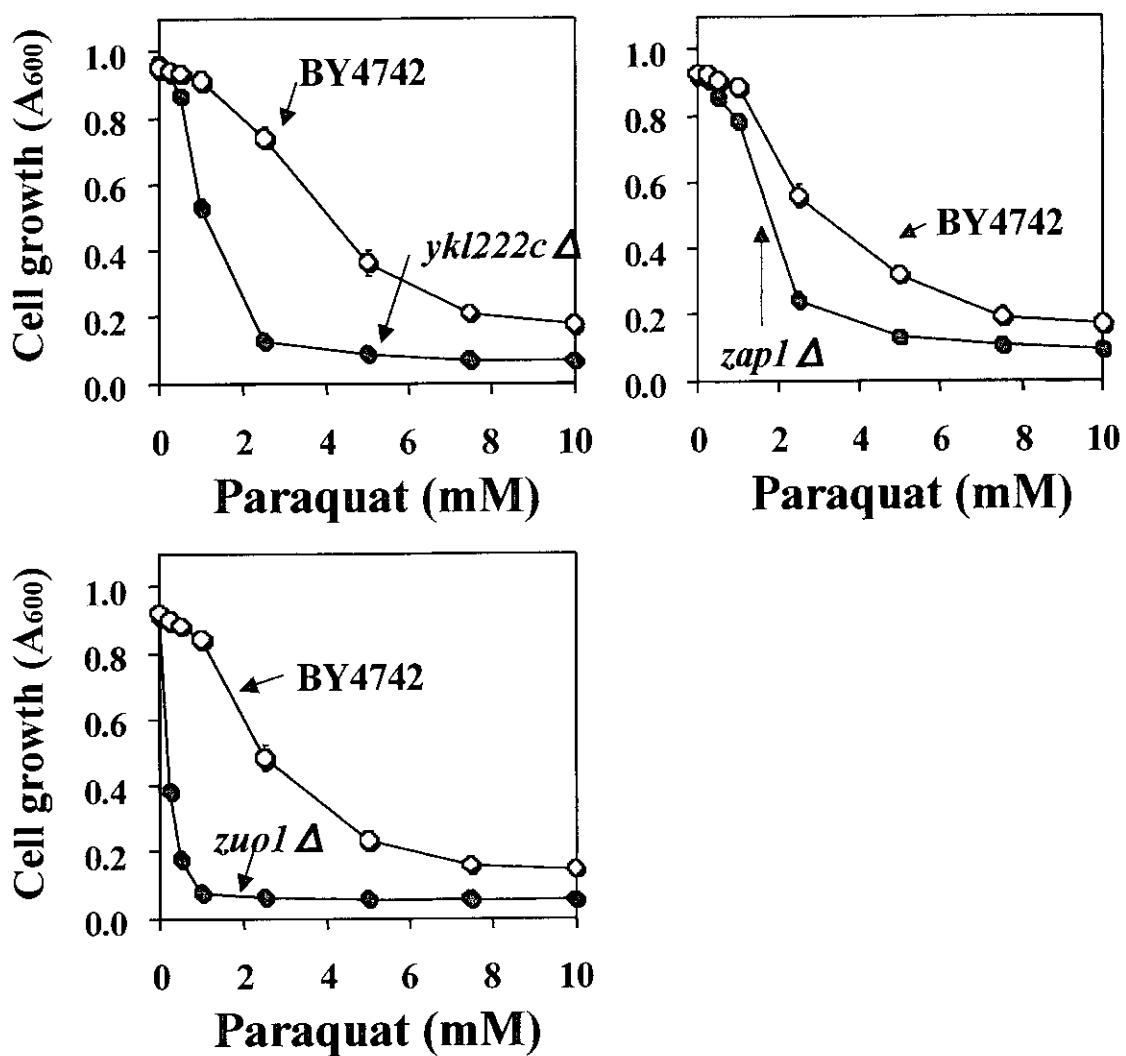

VPS60 : Protein with possible role in vacuolar protein sorting,
has similarity to Snf7p

YBT1 : Similarity to mammalian ATP-dependent bile
acid transporter

YIH1 : Protein with a possible function in general amino acid
control response

Fig. 5-7 Sensitivity of VPS60, YBT1 or YIH1 deletion mutant to paraquat

***YKL222c*:** protein with similarity to transcriptional factors
ZAPI : zinc-responsive transcriptional activator, regulates genes involved in zinc uptake
ZUO1 : zuotin (Z-DNA-binding protein)

Fig. 5-8 Sensitivity of *YKL222c*, *ZAPI* or *ZUO1* deletion mutant to paraquat

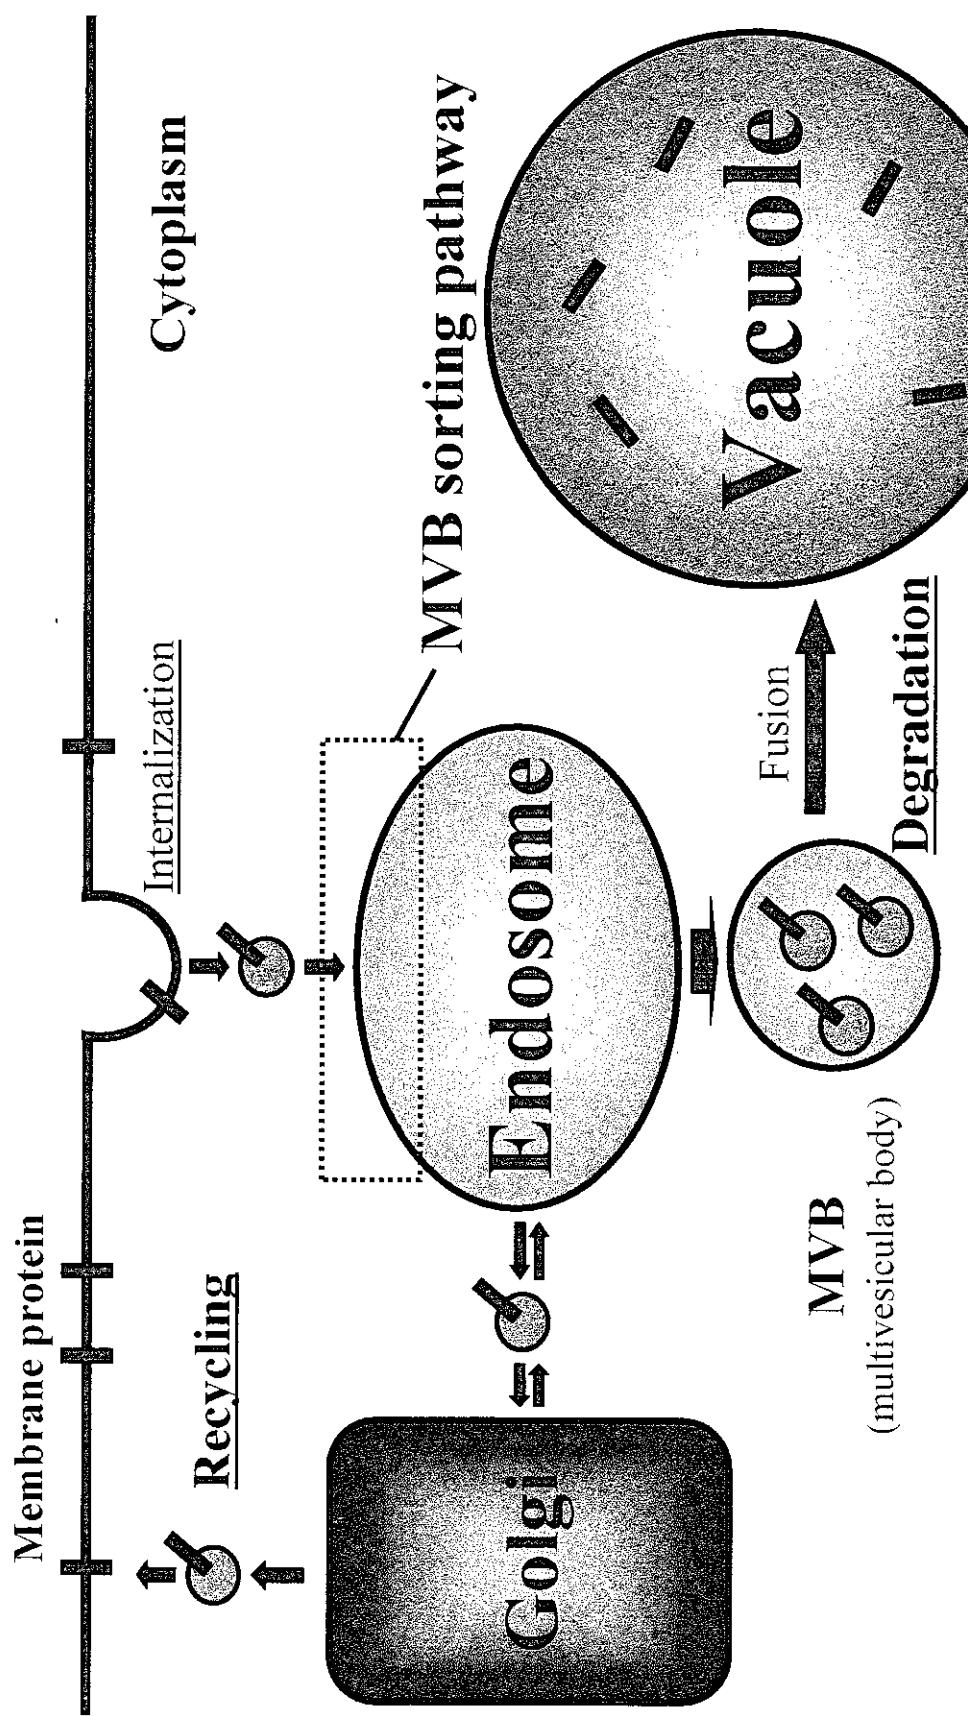

Fig. 6 Model for endocytosis

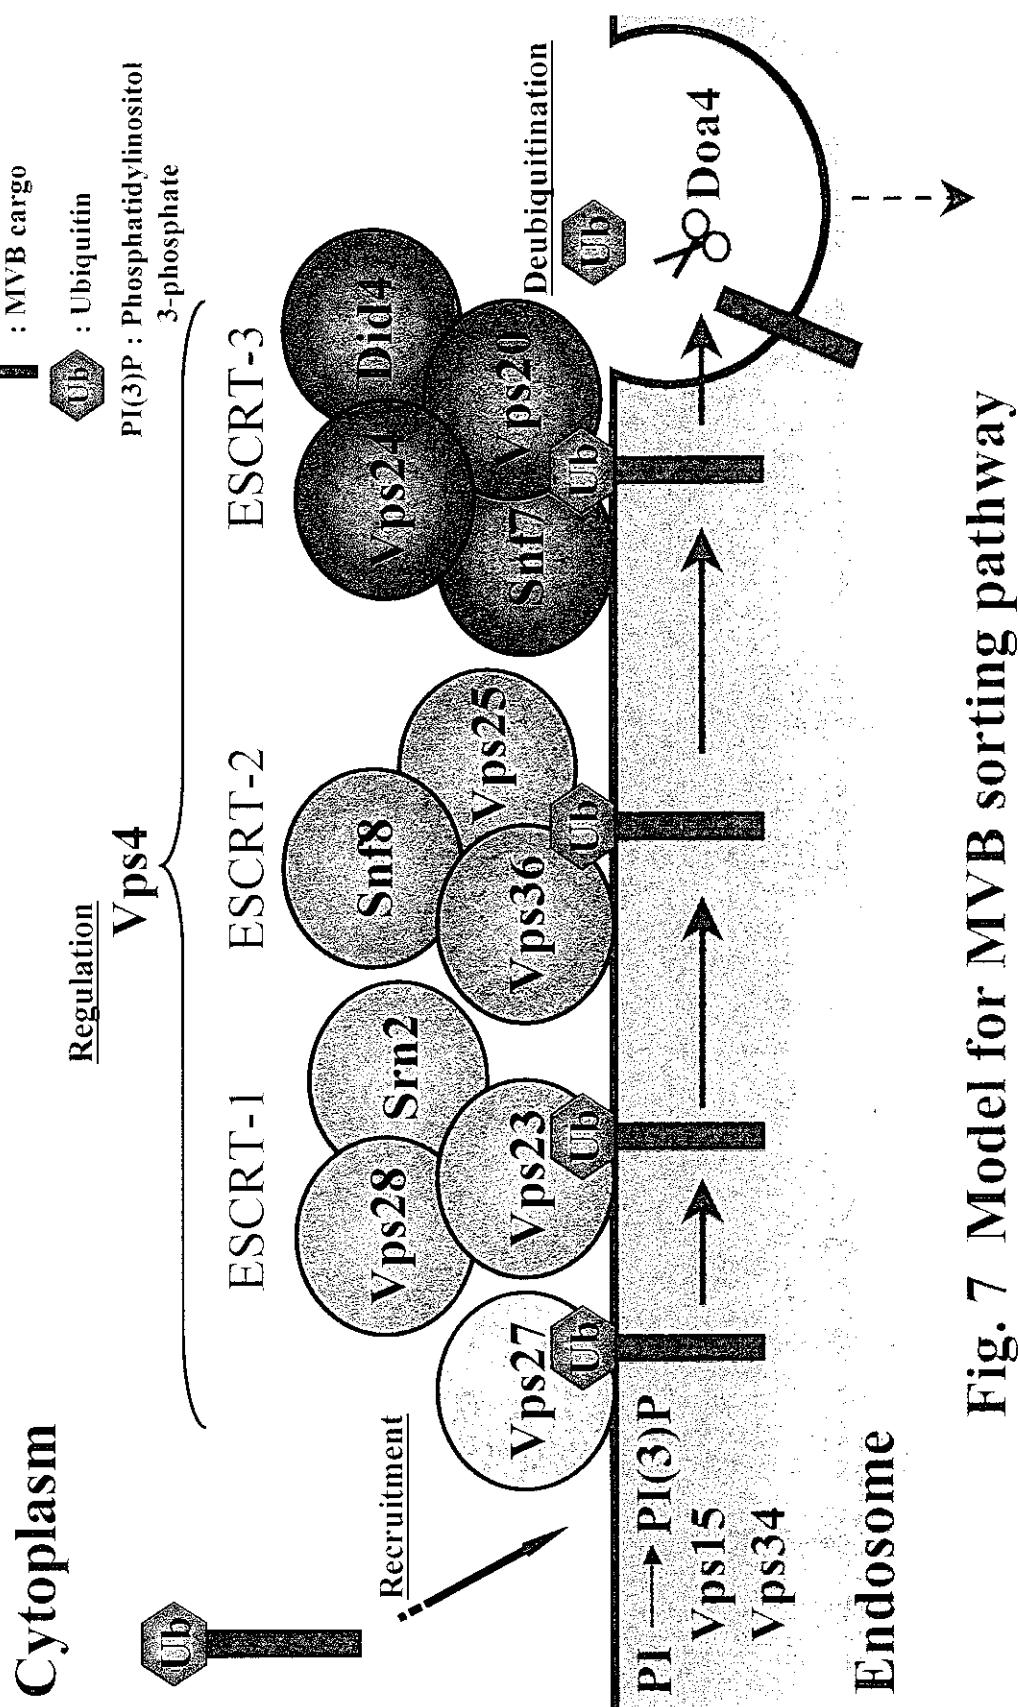

Fig. 7 Model for MV-B sorting pathway

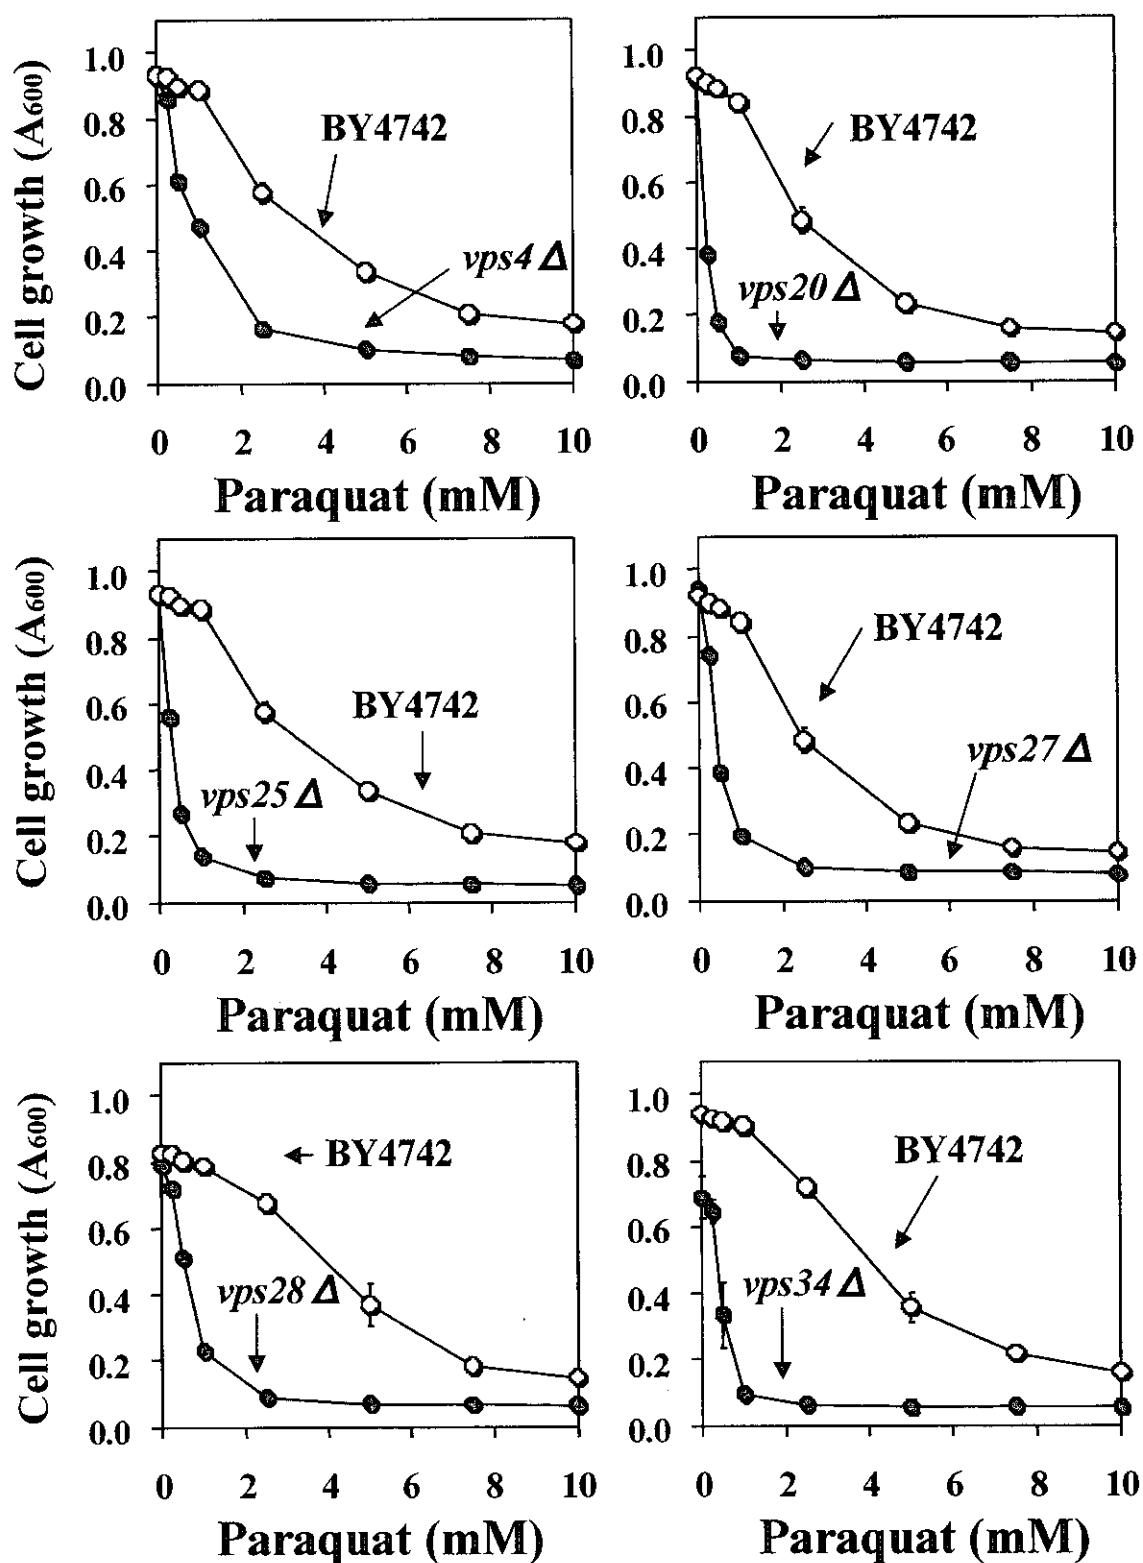

Fig. 8 Sensitivity of *VPS4*, *VPS20*, *VPS25*, *VPS27*, *VPS28* or *VPS34* deletion mutant to paraquat

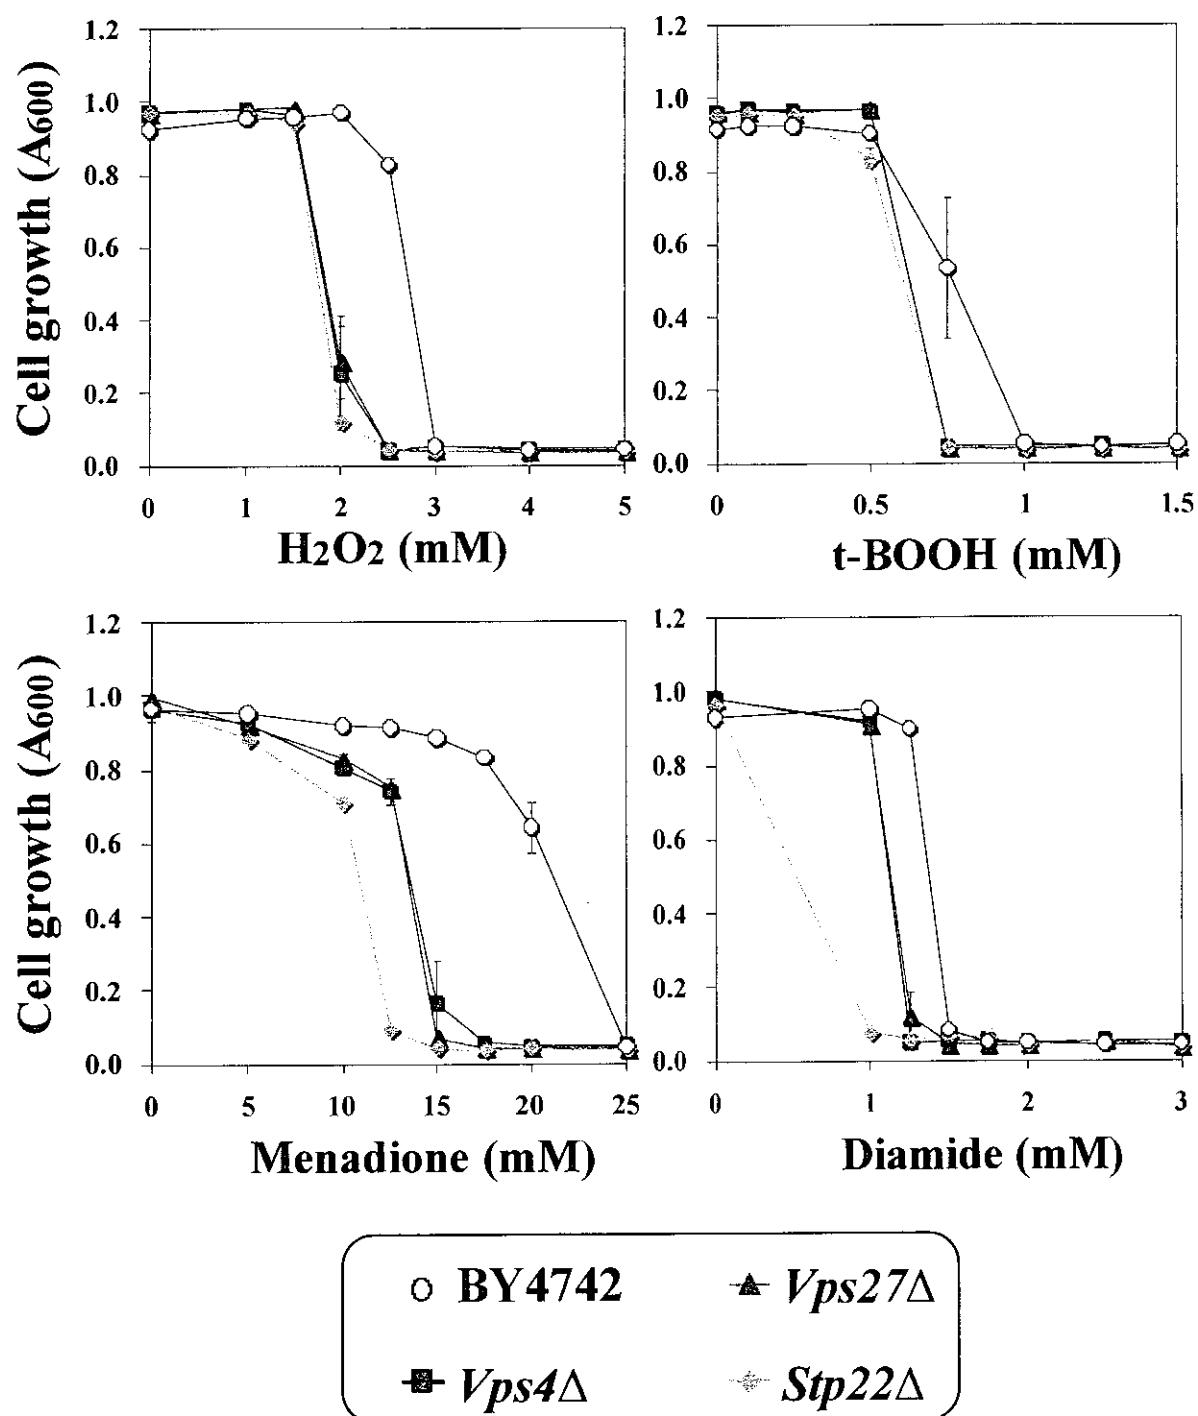

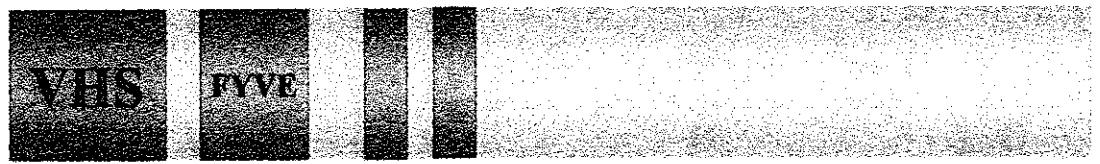

Fig. 9 Effects of deletion of genes related MVB sorting pathway on sensitivity to various drug-induced stress

Vps27

UIM

1

620

a.a

VHS : Efficient binding to ubiquitin

FYVE : Bind specifically to PI(3)P

UIM : Ubiquitin-interacting motifs

Fig. 10 Schematic representation of Vps27

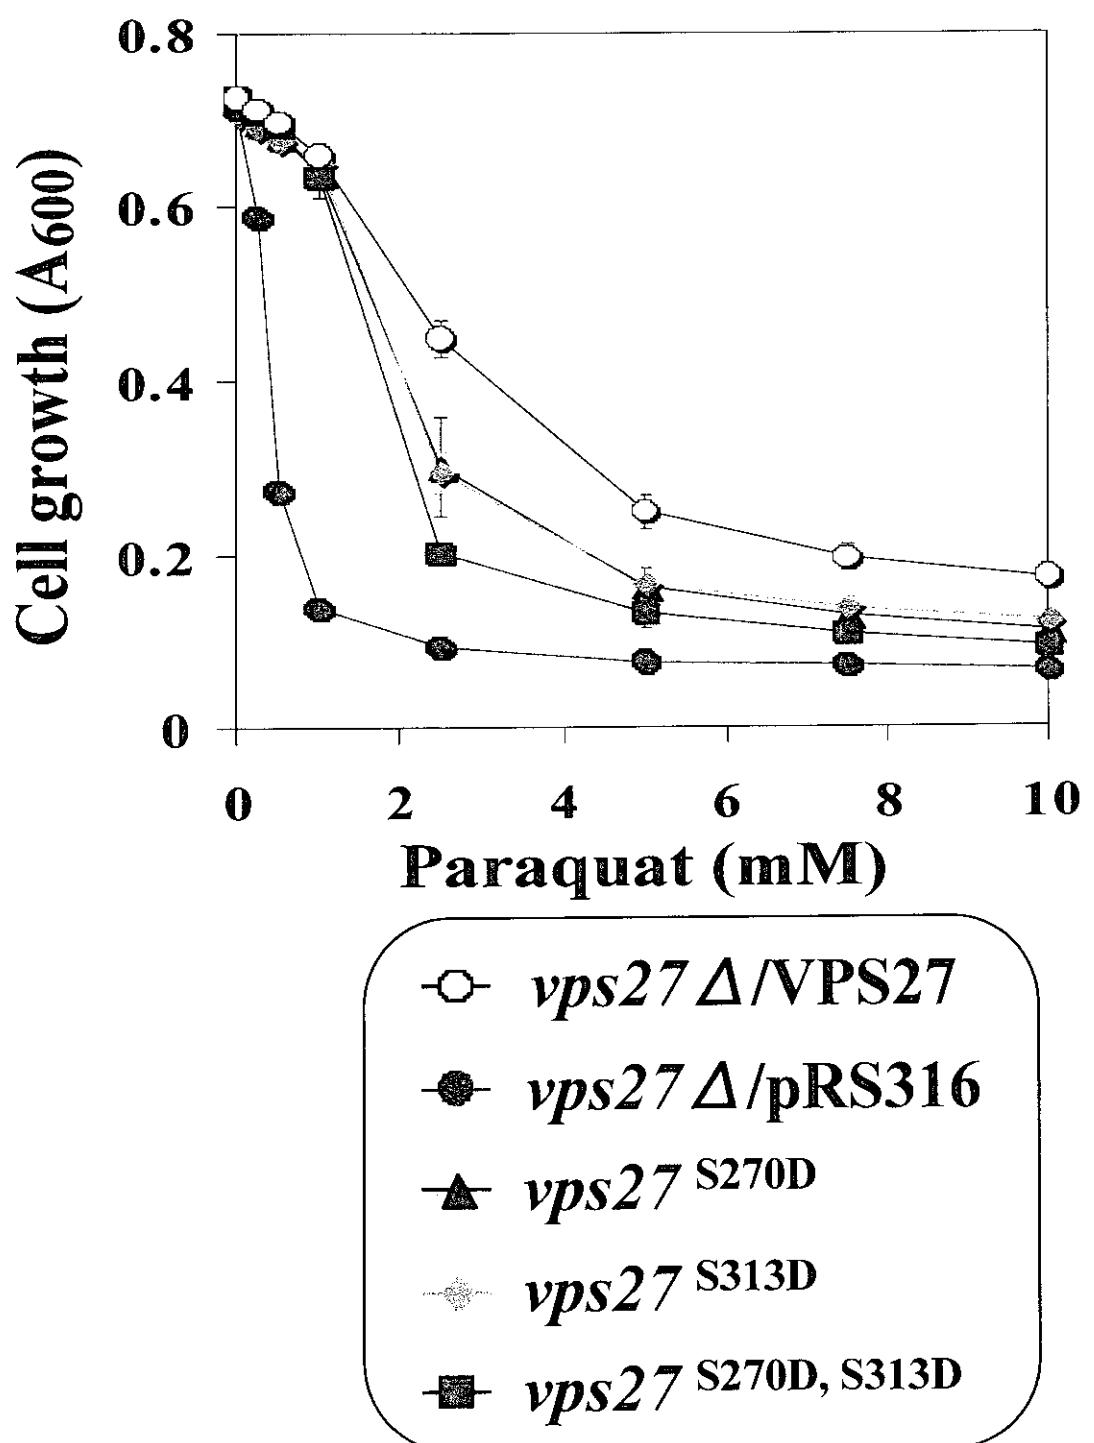

Fig. 11 Effect of point mutations in UIM domains of Vps27 on paraquat sensitivity

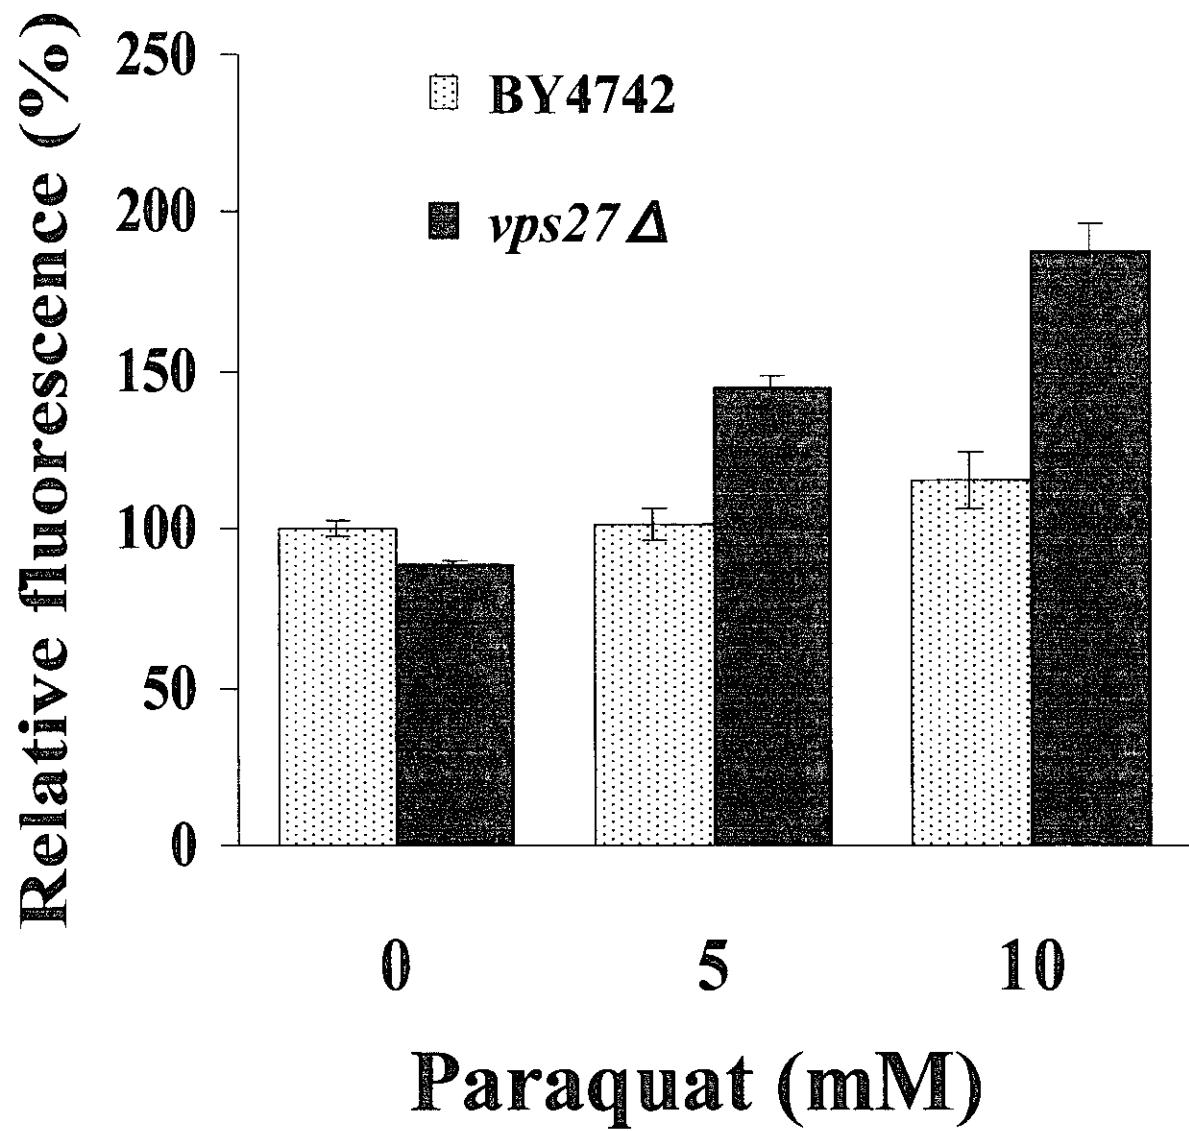

Fig. 12 Effects of deletion of *VPS27* on intercellular ROS levels by paraquat
