Notes: 日本 Base price: 1995 Japanese Thousand Yen. Real GDP does not include statistical discrepancy. Since Japan introduced SNA93 in October 2000 and long run estimates based on SNA93 is available by 1980, the figures from 1970 to 1979 here are based on SNA68, thus not completely comparable. Real GDP estimates of SNA68 is available until 1998 so that Real GDP per capita based on SNA93 can be compared with those of SNA68 from 1980 to 1998. Relative deviations $[(\text{GDP}(\text{at year } t \text{ by SNA93}) - \text{GDP}(\text{at } t \text{ by SNA68})) / \text{GDP}(\text{at } t \text{ by SNA93})]$ are at most 3.4% points (mean=2.2%, sd=0.67%).

Notes: カナダ Real GDP per capita (USD)

Note: ノルウェー GDP per head at the price levels and PPPs of 2000 (US dollars)

Variable ID: 202
 Variable Name: CPI - consumer price index

Notes: 1975: A new estimation procedure was introduced. Result, higher estimates for population and employment (+ 22,000 and 13,000, respectively).

1976: A new questionnaire was introduced. Result, higher estimates for employment (+ 30,000); more family workers and persons temporarily absent from work.

1980: A new estimation procedure and change in the definition of employment was implemented (conscripts classified as employed persons). Result, the estimate for employment was reduced with 26,000 due to changes in the estimation procedure. The change in the definition of employment led to increased employment figures by about 25,000 (conscripts), mainly in the age group 20-24.

1986: Revised definition of employment, concerning family workers. Previously they had to work 10 hours or more per week to be classified as employed, but as from 1986 this condition was suspended (according to ILO recommendations). Result, the number of employed persons increased by 15,000 due to the revised classification of family workers.

1988: As from 2nd quarter 1988 the data are collected monthly. Previously the surveys were based on one reference week each quarter, but thereafter (up to 1st quarter 1996) on one week each month. Result, The change in the reference weeks led to somewhat higher estimates for employed persons (about 10,000).

1996: As from 1st quarter 1996 the data are collected weekly (continuous survey), and some changes in the questionnaire were also introduced. According to new international recommendations the question about availability for work was changed. Previously, the job-seeking person had to be available for work during the reference week. Now the person has to be available within the next two weeks. Result, the changes in the Labour force survey from 1996 led to an increase in the estimate of unemployment by about 11,000 persons (0.5 %) as an annual average.

 ノルウェー NAV (Norwegian Labour and Welfare Organisation): Registered unemployment by region, average per year. (<http://www.nav.no/binary/1073747599/file>)

Notes: 日本 Definition of Region follows:

Name of region	Prefectures included
1 Hokkaido	Hokkaido
2 Tohoku	Aomori, Iwate, Miyagi, Akita, Yamagata, Fukushima
3 Southern-Kanto	Saitama, Chiba, Tokyo, Kanagawa
4 Northern-Kanto,Koshin	Ibaraki, Tochigi, Gunma, Yamanashi, Nagano
5 Hokuriku	Niigata, Toyama, Ishikawa, Fukui
6 Tokai	Gifu, Shizuoka, Aichi, Mie
7 Kinki	Shiga, Kyoto, Osaka, Hyogo, Nara, Wakayama
8 Chugoku	Tottori, Shimane, Okayama, Hiroshima, Yamaguchi
9 Shikoku	Tokushima, Kagawa, Ehime, Kochi
10 Kyusyu	Fukuoka, Saga, Nagasaki, Kumamoto, Oita, Miyazaki, Kagoshima, Okinawa

ノルウェー Based on registered unemployment, not on the Labour Force Survey.
 The Labour Force Survey also includes unemployed persons who do not register with the employment service. The figures for registered unemployment are normally lower than these from the Labour Force Survey.

Source: Statistics Canada, Census 2001

Note: 1- Refers to a private dwelling in which a person or a group of persons is permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day. Unless otherwise specified, all data in housing products are for occupied private dwellings, rather than for unoccupied private dwellings or dwellings occupied solely by foreign and/or temporary residents (Statistics Canada).

2- Includes inoccupied private dwellings: refers to a private dwelling which meets the two conditions necessary for year-round occupancy (a source of heat or power and shelter from the elements), but in which no usual, temporary or foreign resident is living on Census Day.

Note: Student-educator ratio in public elementary and secondary schools, 1 Canada and jurisdictions, 1996-1997 to 2002-2003

Student-Educator Ratio must not be confused with class size. The former is much smaller because it accounts for the personnel outside the class (principals, counselors or specialists) and teachers' time outside the classroom (for preparation and marking).

ノルウェー Statistics Norway - StatBank: Table 04468: Residents in institutions for the aged and disabled. (<http://statbank.ssb.no/statistikkbanken/>)

Notes: 日本 Institutional households in Population Census of Japan include (1)-(6) below. It should be noted that households were, in principle, separated by dwelling unit (mune) for (1), (2) and (3), by company group or ship for (4), by building for (5) and by individual for (6).

- (1) **Students in school dormitories** ... Those students living in a school dormitory.
- (2) **Inpatients of hospitals** ... Inpatients who had been hospitalized in a hospital for three months or more at the census date.
- (3) **Inmates of social institutions** ... Inmates of a social institution such as an aged people's home.
- (4) **Persons in camps of Self-Defence Forces** ... Persons residing in a camp or crew of a ship of the Self-Defence Forces.
- (5) **Inmates of reformatory institutions** ... Persons residing in a prison or a detention house whose penalties had been fixed, or persons in a reformatory or a women's
- (6) **Others** ... Persons who had no usual living places or crews who had no usual living places on land.

カナダ For 2001, the number of population in institution is residual and was calculated by subtracting the number of people living in private household from the number of people in the total population; this was done for each age group.

ノルウェー Residents in institutions for the aged and disabled
