# Disease evaluation with ICF and ICPC-2 for disease control

## Introduction

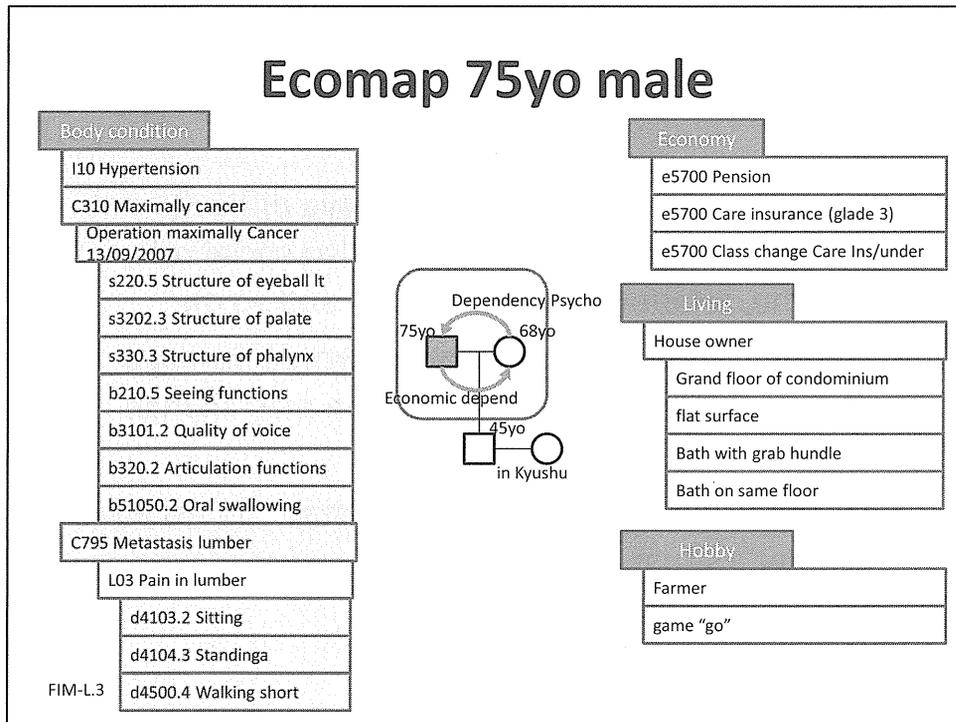

- Infection to Chronic disease
  - Until late in 20<sup>th</sup> century, **infectious disease control was the main issue** to improve public health. Most of these infectious diseases are acute prognosis and we can evaluate health improvement policy by mortality and morbidity.
- Living with chronic disease
  - To control chronic diseases, such as hypertensions, ischemic heart diseases, diabetes mellitus, is the key issue to improve public health status. **Patients have to live with “chronic diseases”**. And population aging increases morbidities of these diseases in a steady stream.
- Prognosis evaluation
  - We have to deal **the prognosis of chronic diseases**.
  - **Screening** is the best way to control chronic diseases.
  - **Morbidity** shows only number of patients.
  - **Chronic diseases have multi target organs**.
  - ***Is it possible to staging chronic disease?***

## Patient evaluation for discharge

- In aged society, some patients have difficulty not only due to decreased ADL but also social role, income, relationship with others and so on.
- During hospitalization, in other words during a short break of social life, situation may change dramatically.
- Hospital social workers use “ecomap” to visualize patient’s situation.
- We applied ICF on ecomap.

## Schema of the study

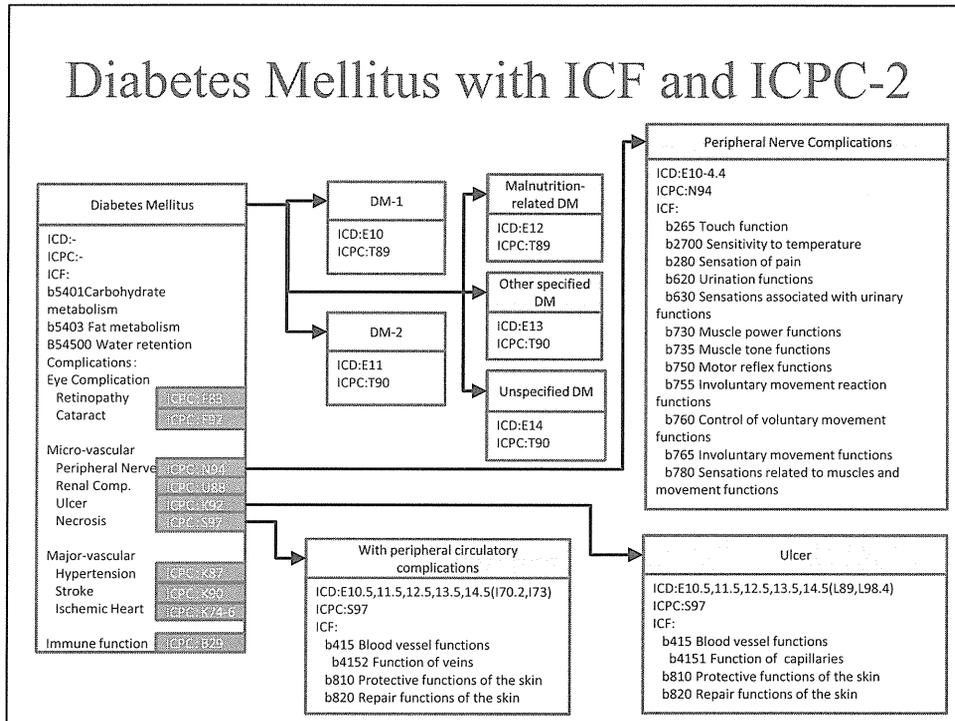

# Severity and Clinical phase

- Colon cancer
  - Invasion
    - mucosa
    - submucosa
    - muscular layer
    - no change on serosa
    - invaded serosa
    - invaded to next organ
  - Lymph nodes
    - no lymph meta
    - sentinel up to 3
    - sentinel more than 4
  - Metastasis
    - no
    - positive

• lymph nodes and metastasis classification are not based on ontology

# Diabetes Mellitus with ICF and ICPC-2

## ICF Power!

- ICF is effective to evaluate one's living.
- It is not easy task to suppose the influence of the disease on daily life.
- ICF can represent the relation between disease and its influence on daily life.
- ICF can also evaluate community health.
