### Author Query Form

**Journal: Advances in Cancer Research, 109**  
**Article No: Chapter 2**

Dear Author,

During the preparation of your manuscript for typesetting some questions have arisen. These are listed below. Please check your typeset proof carefully and mark any corrections in the margin of the proof or compile them as a separate list. This form should then be returned with your marked proof/list of corrections to Elsevier Science.

#### Disk use

In some instances we may be unable to process the electronic file of your article and/or artwork. In that case we have, for efficiency reasons, proceeded by using the hard copy of your manuscript. If this is the case the reasons are indicated below:

- Disk damaged                       Incompatible file format                       LaTeX file for non-LaTeX journal
- Virus infected                       Discrepancies between electronic file and (peer-reviewed, therefore definitive) hard copy.

Other: .....

We have proceeded as follows:

- Manuscript scanned                       Manuscript keyed in                       Artwork scanned
- Files only partly used (parts processed differently:.....)

#### Bibliography

If discrepancies were noted between the literature list and the text references, the following may apply:

- The references listed below were noted in the text but appear to be missing from your literature list. Please complete the list or remove the references from the text.
- Uncited references: This section comprises references which occur in the reference list but not in the body of the text. Please position each reference in the text or, alternatively, delete it. Any reference not dealt with will be retained in this section.

Query Refs.	Details Required	Author's response
Au1	Please update this reference.
