## EUnetHTA Tools

**EUnetHTA HTA Core Model Online**

**EUnetHTA Planned and Ongoing Projects Database (POP)**

**EUnetHTA Evidence database on new technologies (EVIDENT)**

**EUnetHTA Adaptation Glossary & Toolkit**

**EUnetHTA Contact Database**

**EUnetHTA Intranet Groups**

**EUnetHTA E-meeting facility**

**EUnetHTA News Aggregator**

## The POP Database

### Description

The EUnetHTA Planned and Ongoing Projects (POP) database allows EUnetHTA Partners and Associates to share information on planned, ongoing or recently published projects of participating agencies and identify similar projects through a matching system provided by the online database.

### Purpose

To facilitate collaboration among European HTA agencies and reduce duplication of work.

## The POP Database Online

**Login**

The EUnetHTA Planned and Ongoing Projects (POP) database allows EUnetHTA Partners and Associates to share information on planned, ongoing or recently published projects of participating agencies. The aim is to facilitate collaboration among European HTA agencies and reduce duplication of work.

Read more about the objectives and history of POP Database.

The EUnetHTA POP database currently stores 1247 planned, ongoing and recently published projects from 42 EUnetHTA partners from 23 countries.

Dear access, please take notice:  
Since 26th February 2015, the login system is open to all users again. Please use your internet password to log into the application. In case you don't have an internet password yet, please request one at [popdb@eunetha.eu](mailto:popdb@eunetha.eu). Password changes stated in the strand will be effective in POP database within 30 minutes.

This tool is part of the EUnetHTA Joint Action on HTA (2012-2015) which has received funding from the European Union in the framework of the Health Programme.

## POP Statistics: Quarterly Updates

In Spring 2014, POP Database contained: 1,230 planned, ongoing and recently published projects from 44 EUnetHTA JA partners and 24 countries

### (Jan/March 2014) POP Request

Out of 63 EUnetHTA JA partners:

- 28 responded and entered/updated projects in the database
- 11 responded but DID NOT feed the database
- 24 did not respond at all (38%)
- Total number of projects: 1,219
- Alert (SAME) topics: 101 (8%)
- Similar projects (within alert topics): 249
- Access-rights: 41 partners

### (Jan/March 2014) POP Request

Out of 68 EUnetHTA JA partners:

- 35 responded and entered/updated projects in the database
- 8 responded but DID NOT feed the database (no current changes in the projects)
- 25 did not respond at all (37 %)
- Total number of projects: 1,216
- Alert (SAME) topics: 103 (8 %)
- Similar projects (within alert topics): 247
- Access-rights: 46 partners

## The EVIDENT Database

### Description

The EVIDENT Database enables sharing early information on evidence gaps identified during the production of HTA reports and consequent recommendations / requests for additional data collection.

It also contains information on reimbursement / coverage and assessment status of promising technologies in Europe.

### Purpose

To reduce redundancy, promote generation of further evidence and facilitate European collaboration in the domain.

## The EVIDENT Database Online

Access to the EVIDENT Database: <https://evident.has-sante.fr/has/login.xhtml>

European network for Health Technology Assessment | JA2 2012-2015 | [www.eunetha.eu](http://www.eunetha.eu)

53

## 9 Methodological Guidelines for Rapid REA

### Development

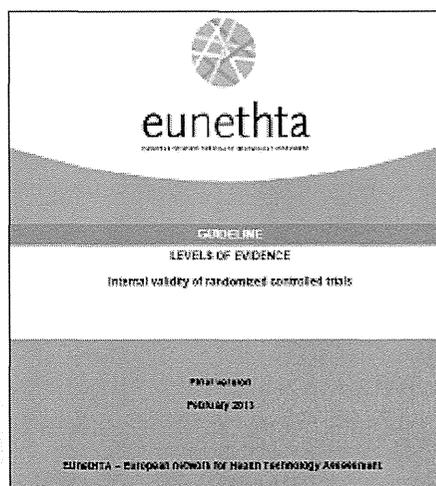

9 Methodological Guidelines for Rapid REA of Pharmaceuticals developed in JA1 by WP5.

### Content

Guidelines on methodological challenges that are encountered by health technology assessors while performing a rapid relative effectiveness assessment of pharmaceuticals.

### Primary Aim

To help the assessors of evidence interpret and process the data that are presented to them as part of a REA.

European network for Health Technology Assessment | JA2 2012-2015 | [www.eunetha.eu](http://www.eunetha.eu)

54

## 9 Methodological Guidelines for Rapid REA

### Endpoints used for REA of pharmaceuticals

1. Clinical endpoints
2. Composite endpoints
3. Surrogate endpoints
4. Safety
5. Health-related quality of life

### Comparators and comparisons

6. Criteria for the choice of the most appropriate comparator(s)
7. Direct and indirect comparison

### Levels of evidence

8. Internal validity
9. Applicability of evidence in the context of a relative effectiveness assessment

### Link to the guidelines

<http://www.eunetha.eu/eunetha-guidelines>

## External Collaboration

## EUnetHTA-EMA Collaboration

- To identify opportunities for and undertake specific steps to improve the efficiency of the process and conditions for patients' timely access to an effective medicine.

## EUnetHTA-EMA Collaboration

- Scientific advice/early dialogues involving regulators and HTAs
- Scientific and methodological guideline development
- Post-licensing (post-authorisation) data generation
- Availability of clinical study data
- Orphan medicinal products
- Cooperation in specific pilot projects of EUnetHTA JA2
- Conferences, workshops and seminars/meetings

## Conflict of Interest and Confidentiality handling

### Background:

- Necessity to standardise across JA2 WPs managing pilots on specific technologies
- No information on the presence of formal policies and procedures in a substantial number of EUnetHTA organisations
  - Diversity of the extent, thoroughness and specific practice of implementation in various organisations – need for a standard policy and procedures for a European level activity
- Concrete experience in JA2 pilots indicated the necessity to have a standard EUnetHTA Col and Confidentiality handling procedures

## Conflict of Interest and Confidentiality handling

### Specific procedures proposal:

- Obligation to inform on the availability of the Col and confidentiality policies and procedures in the partner/associate institutions once they apply for joining EUnetHTA
  - LPs and Co-LPs informed on the availability
  - Status of availability publicly announced on the EUnetHTA website
- DOICU form to be completed by each individual participating in JA2 prior to commencing any work in WP4 and 5 pilots
- DOICU form to be provided to the individuals by the WP4 and 5
  - Completed form to be returned to the respective WP LPs/Co-LPs AND the EUnetHTA Secretariat
  - Info valid until the individual's Conflict of Interest situation changes
- EUnetHTA secretariat sets up a database for the DOICU issues. LPs and Co-LPs are to consult the database prior to requesting completion of the form by individuals (to avoid multiple declarations)

# Thank you

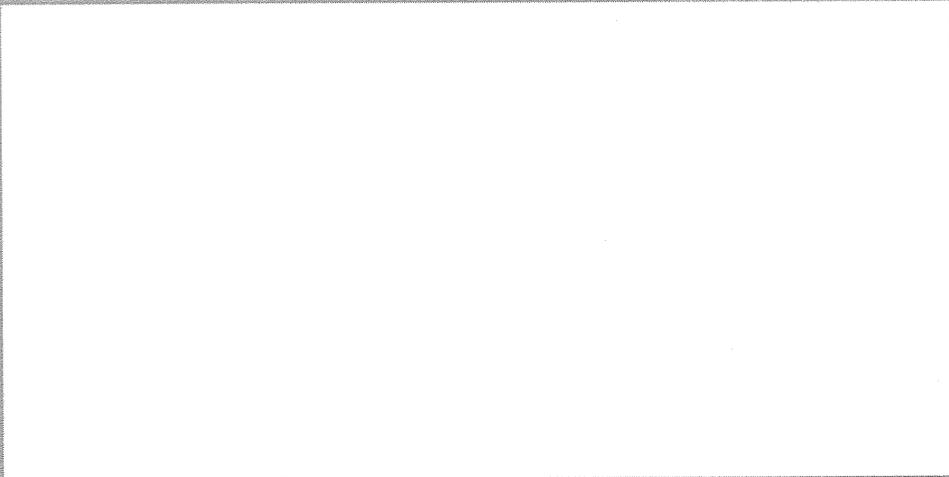

## Any questions?

This presentation arises from the EUnetHTA Joint Action 2 which has received funding from the European Union, in the framework of the Health Programme

#### 4) pCODE (カナダ)

##### < Questionnaire to Health Technology Assessment (HTA) Agencies >

カナダでは抗癌剤をどこが funding するかは下記のように州によって異なっている。

	病院	Cancer Agency	Drug plan
ブリティッシュ・コロンビア		<input type="radio"/>	
アルバータ		<input type="radio"/>	
サスカチュワン		<input type="radio"/>	
マニトバ		<input type="radio"/>	<input type="radio"/>
オンタリオ	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ニューブランズウィック	<input type="radio"/>		<input type="radio"/>
プリンスエドワードアイランド	<input type="radio"/>		<input type="radio"/>
ノバスコシア	<input type="radio"/>		<input type="radio"/>
ニューファンドランド・ラブラドール	<input type="radio"/>		<input type="radio"/>

1 Please describe the annual budget in your organization, department and division of economic evaluation.

1.1 How much amount of the annual budgets do you set up for pCODR?

年間 200 万カナダドル(約 1.9 億円)、CADTH 全体では 3500 万カナダドル(約 33 億円)である。

1.2 Does funding come from the central/local government, pharmaceutical companies (or industry groups) and/or others?

・ According to your web site, pCODR is funded by provinces and territories. Do you have other funding sources?

財源は州(province)からのみ。CADTH は連邦政府からの資金も含まれる。

- 1.3 Who will cover the cost incurred for a review process (e.g. pharmaceutical companies pay for the cost)

財源 2015 年 4 月より、レビュー1 件あたり 72,000 カナダドル(約 700 万円)、適応拡大等の場合は 57,000 カナダドル(約 550 万円)を企業が支払う。ただし、cancer agency 等が提出する場合は、費用は免除されている。

レビュー1 件あたりにかかる費用はおよそ 10 万~14 万カナダドル程度。

- 2 Please describe the number of staff of your organization, department and the division of economic evaluation.

- 2.1 How many health economists and other experts work for pCODR as staff?

職員としては 11 人、医療経済学を専門としているものはいないが、臨床疫学者が 3 名いる。ただし、医療経済学者は 20 名、臨床家/臨床疫学者は 50 名からなる外部の専門家パネル (Economic Guidance Panel, Clinical Guidance Panel)を持っている。

- 3 Please describe an economic evaluation method of healthcare technologies that are utilized in your country.

- 3.1 Please describe the scope of the technologies to be assessed.

- ・ Are all anti-cancer (inpatient and/or outpatient) drugs assessed by pCODR?
- ・ Do you re-evaluate of drugs in post-marketing phase?

外来薬と病院薬をともに評価する。市販後の再評価(複数の薬剤の同時評価)について、現在は実施していないが、将来は検討している。

ただし、支持療法の評価は CADTH で実施している。

- 3.2 When performing an economic evaluation, who is responsible for analyzing data and developing the models? (e.g. manufactures, independent academic groups, pCODR)

pCODR には、製薬企業、tumor group(医師のグループ)、各州の cancer agency が提出できる。提出者がレビュープロセスに必要な情報を提供する。
