

## Services for the Provision of Equipment for Everyday Life

We provide the following equipment with the aim of accommodating children with specific chronic pediatric diseases. This pertains to children who are at home and face considerable obstacles in their everyday lives.

Please direct inquiries regarding these services to your local government.

- Eligibility: Must have claimant certification for medical care for children with specific chronic pediatric diseases and must also meet the conditions listed in the eligible persons column for the relevant item.
- Applications: Submit to your local municipality (including special wards)
- Costs borne by patients: Patients bear some costs, which are adjusted according to your household income.
