Dear dr Fumihiko Hinoshita (Head, The research group on grasping the health and living situation as well as creating the support infrastructure for thalidomide-impaired people in Japan) and colleagues interested in the thalidomide embryopathy around the world

Last week it came to our attention by dr. Paula ●● (a medical doctor in Brazil also thalidomide-impaired ) that the Brazilian Thalidomide Victims are receiving letters from The Contergan Foundation in Germany that the Foundation will stop to send the reparation money to them.

I'll let Paula explain herself the situation, and we will ask probably your support for more information and help in this issue

Thank you

Lavínia
