GRAPHICAL ABSTRACT

From ^athe Center for Pediatric Inflammatory Bowel Disease, Division of Gastroenterology, National Center for Child Health and Development, ^bthe Department of Pediatrics and Adolescent Medicine, Juntendo University Graduate School of Medicine, Departments of ^cGenome Medicine and ^dSystems BioMedicine, National Research Institute for Child Health and Development, ^ethe Division of Immunology, National Center for Child Health and Development, ^fthe Department of Allergy and Clinical Immunology, National Research Institute for Child Health and Development, ^gthe Department of Pathology and ^hthe Allergy Center, National Center for Child Health and Development, ⁱthe National Research Institute for Child Health and Development and ^jthe Division of Eosinophilic Gastrointestinal Disorders, National Research Institute for Child Health and Development, Tokyo.

*These 2 authors contributed equally to this study.

This study was supported in part by Initiative on Rare and Undiagnosed Diseases (grant nos. 19ek0109301s and 20ek0109301h) from the Japanese Agency for Medical Research and Development (AMED); National Grants-in-Aid to the National Center for Child Health and Development (grant nos. 2019A-3 [to K.A.], 2020B-10 [to I.T.], 2020B-2 [to K.M.], #29-2 [to H.M.], and 2022B-11 [to H.M.]); a Health, Labor and Welfare Sciences Research Grant for Research on Policy Planning and Evaluation for Rare and Intractable Diseases, from the Ministry of Health, Labor and Welfare (grant no. 20FC1016 [to I.N.]); and a Health, Labor and Welfare Sciences Research Grant (grant no. 21FE2001 [to H.M.]).

Data availability: The data sets generated and/or analyzed during the current study are available from the corresponding author on reasonable request.

Ethical considerations: This report was approved by the Institutional Review Board of the National Center for Child Health and Development, Tokyo, Japan (#378, #725, #926).

Written informed consent from the patient's parents and assent from the patient were obtained when appropriate. All animal protocols were approved by the Animal Care and Use Committee of the National Research Institute for Child Health and Development, Tokyo, Japan (#A2017-006-C03). Recombinant DNA experiments were conducted in accordance with the approved protocol (#17-3).

Disclosure of potential conflict of interest: H. Morita has received a research grant from GlaxoSmithKline. The rest of the authors declare that they have no relevant conflicts of interest.

Received for publication July 5, 2022; revised November 29, 2022; accepted for publication December 5, 2022.

Available online December 17, 2022.
